Exterior Pressure Washing Customer TO DO List

In order to make your experience with Carlson & Strand Painting a pleasant one, we are providing you with a few things that will help the project run more smoothly. If you have any questions please call.

- Please make sure all windows are closed.
- Please move all hanging & potted plants away from the house.
- Please have someone at the site to check all interior window ledges after pressure washing for water leaks.
- If you are aware of a window leak please inform the pressure washer.
- Please move all furniture off of decks, or other areas that are to be included in the pressure washing.
- Please make all necessary arrangements for pets to be contained inside the house or other confined area so the painters don't accidentally allow the animal to escape.
